

Our UniversalReader for direct-part-marking applications

Our **NEW** 06 universal reader is ideal for all marked surfaces. It offers remarkable homogenous illumination allowing reads from all surface types. Codes as small as 0.5mm to 50mm can be read.

Other industries this product is ideal for are automotive tracking / printed electronic board tracking / surgical instrument tracking and aerospace industries.

Key Features

- *Outstanding reading performance*
- *Cost affective*
- *Homogenous illumination to suit any application*
- *Laser / Peen – No problem*
- *Read from any surface type*
- *Code size 0.5mm – 50mm*
- *Rugged / industry ready*
- *Quality in accordance with standard ISO/IEC 15415 - ISO 16022*
- *Fastest and most reliable for DPMR*

Technical Specifications

Mechanical Characteristics

Dimensions	127mm W x 127mm D x 113mm H
Weight	1.5KG

Electical Characteristics

Input Voltage	12V AC - DC
Operating current (average):	300mA
Illumination type	Dome LED
Illumination colour	White
Supported Interfaces	USB 1 - USB 2

Supported Barcodes

DataMatrix
Liner

Environment

Operating tempreture	0 - 50 Deg C
Storage tempreture	-20 to 70 Deg
Humidity	20 - 90% (non-condensing)
Drop Specifications	Withstands multiple drops to concrete from 5ft. 1.5
